

DR. HIRMAND IS PLEASED TO ANNOUNCE THE LAUNCH OF

THE MISSING LINK IN NON INVASIVE FACIAL REJUVENATION!

SILHOUETTE INSTALIFT™

Non-surgical, collagen-inducing, micro-lift treatment uses resorbable sutures to gently lift the deeper layers of sagging facial skin of the midface, jawline & jowls.

pre-treatment

4 months post treatment

the treatment

- 30-minute, comfortable, in-office procedure
- FDA approved, non-surgical, no anesthesia
- Downtime comparable to injectable fillers
- **Immediate, long-lasting results**

how it works

- Resorbable sutures gently lift sagging skin of face, jawline & jowls.
- Sutures naturally absorb with time, while stimulating collagen production & tightening

Says Dr. Hirmand...

"This breakthrough treatment is the long-desired answer for those who aren't ready for surgery but looking for an immediate and effective lift.

Instalift picks up where fillers and tightening technologies leave off!"
